

RCGILTNER Services Inc. Partners with DecisionLogic for Non-Customer Acquisition using Real Time Checking Deposit Analysis, Account Verification and Integration on its Consumer and Small Business Digital Lending Platforms.

Louisville, KY/October 31, 2017/ To help its community banking clients remain competitive in the digital, mobile and online lending market place, digital lending provider R.C. Giltner Services, Inc. has selected DecisionLogic to enhance its non-customer acquisition lending solutions.

FI clients will now be able to offer the unique customer experience the Business and Consumer MinuteLender® digital lending tool provides to acquire new customer relationships using account aggregation from any FI, including the primary small business checking account and related relationships for businesses and the consumer primary checking account.

RCGILTNER's solution is unique in the industry in that it makes a loan offer in 30 seconds and consummates a loan with e-sign in five minutes. It does so under the FI's brand and underwriting for loans on its balance sheet with its proven compliance. While the tool is customized to match processes and parameters set by the FI, the scope of the program can also be set to fit market opportunities that vary by FI. In addition to the convenience factor of obtaining a loan via a mobile device, loans are delivered at a significantly lower cost.

About Decision Logic

DecisionLogic is an advanced bank verification system for enabling lenders to instantly verify a potential borrower's banking information online and in real-time.
